| RAGIONE SOCIALE E INDIRIZZO DELL'OPERATORE DEL SETTORE ALIMENTARE RESPONSABILE DELLE INFORMAZIONI SUGLI ALIMENTI E CON IL CUI NOME E' COMMERCIALIZZATO IL PRODOTTO<br><i>The business name and address of the food business operator responsible for the food information shall be the operator under whose name or business name the food is marketed</i> | ARMATORE srl Via Campinola, 1 84010 Cetara (SA)   |
| NUMERO DEL BOLLINO CE - <i>Registration Number</i>   | IT U6W78 CE   |
| DESCRIZIONE DEL PRODOTTO - <i>Product Description</i>  | Fish product that has undergone an enzymatic maturation treatment in brine. After about 10 months of maturation the anchovies are filleted and preserved in olive oil in aluminum tin |
| MATURAZIONE - <i>Maturation</i>  | In chestnut tins for 10 months  |
| MODALITA' DI CONFEZIONAMENTO - <i>Packaging mode</i>   | The fillets of anchovy fillets, after maturation, are preserved in oil and placed in aluminum containers. The material used for packaging complies with current regulations.          |
| CONFEZIONI - <i>Weight</i>   | 90g   |
| GIORNI DI VITA DEL PRODOTTO ANCORA NEL SUO IMBALLO ORIGINARIO - <i>Shelf life in original packaging</i>  | 18 months   |
| MODALITA' DI CONSERVAZIONE - <i>Storage conditions</i>   | Store the product between 4° and 15°. Once opened, keep the anchovies in the refrigerator, dip in olive oil (topping up if necessary) and consume within 7 days.                      |

## 1. FLOWCHARTS

For the elaboration of the process flow-charts relating to the activities described, governed by the EC Reg. 852/2004, a particular symbol was used to facilitate the visualization of the lights and processes.

The flow chart has the function of helping to define the dangers of the process, the possible crossings between different products and possible alternative processing solutions and therefore to identify the critical control points (CCP) of the HACCP plan.

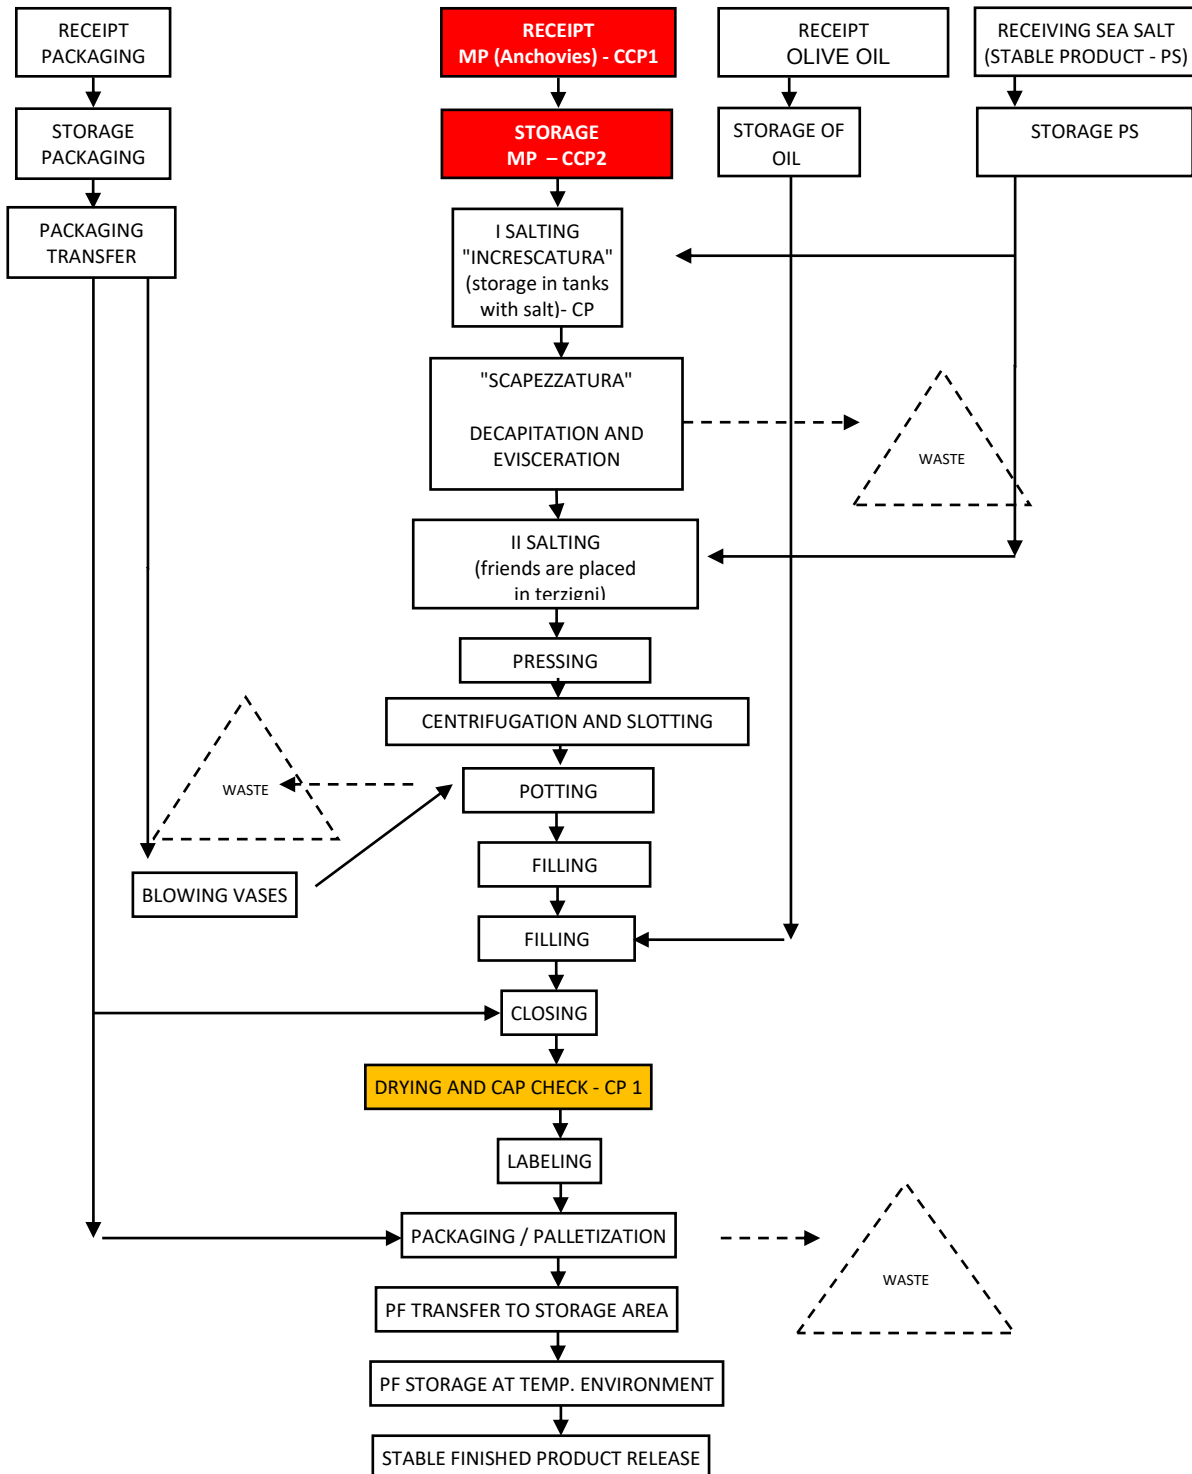

Furthermore, the same diagram can be used when training personnel to understand for each phase which are the preventive activities that must be adopted.

Below is the legend of symbols and colors:

|             |   |
|-------------|---|
|             | The phase is a CP, that is, it involves an operational control  |
|             | The phase is a CCP  |
|             | The phase does not include CCP / CP and is normally managed with GMP and GHP  |
| →           | Process flow (raw materials, intermediates and packaging)<br>If it is not continuous but interrupted by the arrow, it indicates that the flow can take two different directions (optional). If it is continuous, it indicates that the process always occurs. |
| - - - - - → | Waste flow (MSW: Urban Solid Waste; Waste: Category 3 material; Residual water: processing waste destined for treatment)  |
| - - - - - → | Water flow  |

|                 |  |                            |

|                 |  | PAGE       | 5 of 5          |

The HACCP team, in order to confirm the flow chart, carried out some production inspections on different days and times, found that the flow charts shown in the previous point actually reflect reality and are actually applied: therefore the flow chart has been confirmed.
